

Welcome to the May 2011 edition of the Miller Construction Robert Gordon University Newsletter. We hope that you enjoy this update of the progress of the construction. We will send you this newsletter each month so you know what we are doing on site.

Below is a 3D model of the new building that has been started on site.

Over the coming months we will show you photographs from the site and more images of the inside of the building as it progresses.

## What's happening in May and June?

- Set up of the site accommodation, including offices, meeting rooms, sample rooms, canteen, toilets and changing rooms.
- Meetings with local residents and business to ensure that everyone is aware of the building works
- Forming a new road entrance so that our deliveries to site are off the main road as quickly as possible.
- Demolition of the old Treehouse Nursery.

## Garthdee Liaison Group

Representatives from Miller Construction will join Robert Gordon University representatives at the next Garthdee Liaison Group meeting in May to present the plans for the new building and answer any questions relating to the construction programme.

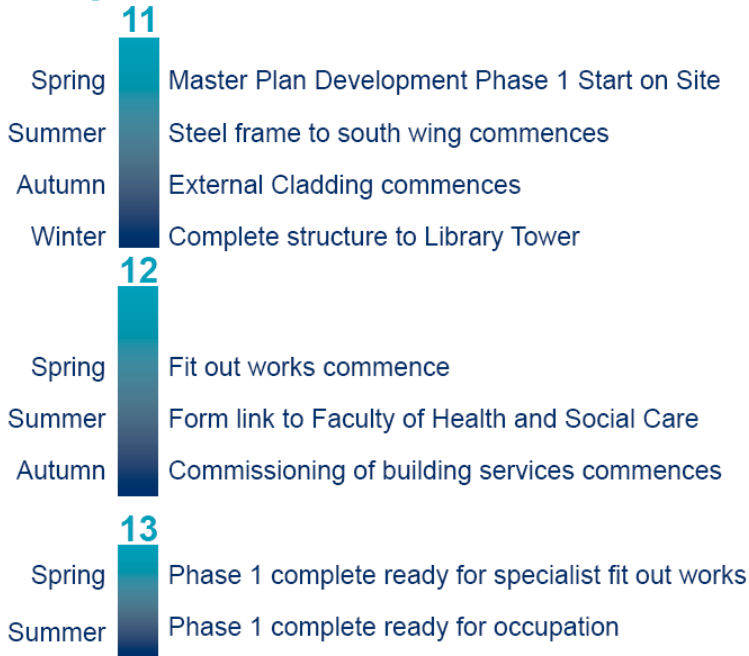

## Considerate Constructors Scheme

Miller Construction is proud to be an Associate Member of the Considerate Constructors Scheme. The Considerate Constructors Scheme is the national initiative, set up by the construction industry, to improve its image. We are monitored against a Code of Considerate Practice, designed to encourage best practice beyond statutory requirements. The Scheme is concerned about any area of construction activity that may have a direct or indirect impact on the image of the industry as a whole. The main areas of concern fall into three main categories: the environment, the workforce and the general public.

Miller Construction has been successful recently winning 7 awards nationally for the sites we have been working on. We have registered the Robert Gordon University site with the CCS and will keep you informed with the activities we will do on site to ensure we are having a positive effect on the community while we construct the new building. Further information on the scheme is available on <http://www.ccscheme.org.uk/>
