

School of Nursing, Midwifery & Paramedic Practice

PRACTICE EDUCATION LECTURER (PEL) SUPPORT FOR PRACTICE LEARNING (Session 2021 -2022)

The School of Nursing, Midwifery and Paramedic Practice works in partnership with practice colleagues in order to support student learning in practice. Each practice learning environment (PLE) has a designated PEL (Appendix 1) who ensures relevant professional regulatory standards are maintained through our quality assurance processes (for example, audits and PLET meetings).

The PEL team adopt a 'stage approach' to practice learning support. This means that for each stage, there are 3 named nursing PELs, 1 named midwifery PEL and 1 named paramedic PEL, responsible for supporting student learning across **all** practice settings. The PEL team should be contacted if there are any concerns regarding student performance in practice. Contact details are detailed below.

Should you require advice or support in relation to the performance of a student in practice, please email the relevant stage PEL email address listed below. **A member of the team will reply within 48 hours of the initial contact unless the initial contact is after 4pm on a Friday when the earliest reply will be the following Monday.**

NOTE: January 2022 - Currently staff are working from home, so please contact the relevant team using the generic stage email addresses noted overleaf).
